

# Our Approach

Effectively moving families from poverty to possibility takes a devoted team. So, we bring corporate, community and government partners together to carry out a Collective Impact-3D-Approach. Our collaboration ensures we are making a sustainable and scalable impact.

We **diagnose** community challenges through our deep and trusted relationships with government, schools and community based organizations.

We **design** community solution action plans together with community partners.

We **deploy** resources and volunteers in accordance with a strategic plan that is leveraged by private and public dollars.
